

**Joint Meeting of the Vallejo Planning Commission,
Economic Vitality Commission, and
General Plan Working Group
November 23, 2015**

Summary of Recommended Modifications and Clarifications to the
Draft Preferred Scenario

Planning Commission

- The narrative should specifically reference closing gaps in the San Francisco Bay Trail as it runs through Vallejo, which would help better connect California State University Maritime Academy with other destinations in the city.

EVC Comments

- Recommend combining the three gateways near the intersection of I-80 and Hwy 37 into a single gateway, as this gives equal treatment with gateways in South and North Vallejo.

GPWG Comments

- In the narrative about Mare Island, clarify that that markets and restaurants in the historic core will contribute the quality of life of island residents.
- In the narrative, clarify that the Preferred Scenario includes a continuous green band of open space along the waterfront from the Zampa Bridge to the Mare Island Causeway.
- The narrative should emphasize access to and use of the water by boaters and swimmers along the length of the waterfront.
- The narrative should emphasize that livability extends to all neighborhoods in Vallejo, and it should reference enhanced connections between Mare Island and the mainland by ferry and water taxi.
